

The Brain Hat is simple to make - it consists of a head-band with a picture of the brain attached to each side.

Your child can join the dots to represent the messages that the brain sends, using whatever colours they choose

They can colour their brain in too if they like!

We suggest a strip of paper at least 50cm long to make the band for the Brain Hat. You can print these templates out (use two strips joined together for each hat), or simply make your own!

Four horizontal dotted lines spanning the width of the page, intended for writing or drawing.
